

PIONEER CEP
CUSTOM ELECTRICAL PRODUCTS

February 16, 2015

To Whom It May Concern:

Pioneer Custom Electrical Products Corp. fabricates and assembles electrical distribution equipment in the United States. Our corporation headquarters is located in Santa Fe Springs, California. A small percentage of the raw components are sourced from countries other than the United States. The large majority of design, fabrication, assembly, and testing is done in our facility in Santa Fe Springs, CA. Our product lines include Pioneer CEP low voltage switchboards and panelboards, Pioneer CEP medium voltage switchgear, Integrated Power Centers, UL 1558 Power Circuit breakers, Unit Substations and Solar Skid Mounted Collector Stations, and NEMA Enclosures in 3R, 4, 4X & 12, Stainless Steel and Aluminum. We are a division of Pioneer Power Solutions, Inc., located in Fort Lee, NJ. PPSI also has divisions in Minnesota and Wisconsin.

Pioneer CEP is fully compliant with a "Buy American" contract provision.

Please feel free to contact us with any questions or concerns.

Sincerely,

Lory Moger
